

Seasons Greetings

DECEMBER 1967

Dear Employee and Family:

This year, more than ever, the Christmas message that has passed through the centuries...

"Peace on Earth, Good Will to Men"

conveys a more significant meaning. In view of the troubled times in the world, it is our prayer that the new year will result in progress toward the attainment of World Peace among all nations.

Let us take a moment then to thank our Maker for His many blessings to us. Let us pray that strength be given those who are working for an understanding world. Let us pray that the blessings of peace be ours, to live in harmony, and to be able to plan for the future with assurance.

Let us enjoy to the utmost the meaning of this Holiday Season with our families and friends.

These thoughts represent the spirit of our Christmas message to you. And, to you and your family, our most sincere Holiday Greetings. May the true spirit of this Christmas Season bring to you its joy, hope and abiding faith.

Lloyd

December 20, 1967

MANUFACTURING EMPLOYMENT
AT ALL TIME HIGH!

Carl Deig, manager of manufacturing, reports that, with employment at peak production, output is three weeks behind schedule to satisfy our backlog of orders. Carl hopes that the quality will continue to improve with the results meaning more satisfied customers. Our inventory is high but several models and sub-assemblies are yet to be produced to give our distributors their requirements.

AG-PRODUCTS MARKETING DIVISION

The 1968 selling season is off to a flying start here in the Ag-Products Division. Orders far exceed those of last year at this time. The sales staff has been busy outlining sales plans with distributor personnel and taking orders for equipment to meet their spring requirements.

The Ag-Products Service Department has been conducting service clinics for distributor service and sales personnel in Minnesota, Arkansas, Georgia, and Evansville. Just one more to go after the first of the year... in Toledo, Ohio. The service clinics have been well received at each location and "thanks" to Louie Carroll... Ralph Acock... and Harold Stevens and Lloyd Hahn... for their part in putting on the "good show" and making them the successful meetings that they were.

Just been talking with Wayne Wallace of the Ag-Products Parts Department. He gave an account of his recent trip to one of our distributors in California. Wayne wants to pass on the word that, if anyone has a notion traveling is fun... forget it! Wayne claims the work days are long... and the nights all too short!

The Christmas Season is upon us... again...

already ... so soon! But there is no let up. Everyone is keeping their shoulder to the wheel and the long weekends ahead should be restful... helping us to head into 1968 with a renewed vigor!! We are confident we have a real winning combination this year.

HECO HIGHLIGHTS

Heco Sales Division reports total early orders 5% ahead of last year. However, riding mowers are 10% ahead of a year ago at this time. We expect to have 15% more riding mowers on order over a year ago on January 1st, 1968.

Snow blowers are completely sold out for this year. A significant increase in snow blower shipments can be expected in June, July, August, and September of this fiscal year... providing the snow belt area of the country receives normal snow fall during the January through March period.

Greater promotional and advertising program directed to both the distributor and the dealer is hopefully expected to continue sales growth throughout the spring selling season on mowers, tillers, and riders. The greater portion of the riding mower increase in business is coming from the two new 32" riding mowers introduced for this year.

PERSONNEL

W-2 forms, covering earnings for 1967, will be ready in late January. Anyone having changed their marital status... or wishing to change the number of dependents claimed... should contact the Personnel Office and complete a new W-4 form.

If you have CHANGED YOUR ADDRESS in the last few months, please PRINT IT and attach it to your time clock card so payroll will have an up-to-date address for everyone when they

gin to mail out the W-2 forms.

Also, it is important that, if you have a claim in for hospital or major medical expenses, please come up to the employment office to complete the necessary insurance forms so you can receive your check.

Bill Bridge announces that, Evelyn Buente, RN has begun employment this week as our plant nurse. She is currently being trained in administrative procedures and will be in her new hospital and first aid room that is planned to be built next to the plant lunch room. Completion date for her new facilities will be next month. Equipment is now being ordered. You will be notified as soon as she can be equipped with temporary quarters.

CHRISTMAS CLUBBERS SAVE \$33,615.00!!! Our thrift-minded Hahn employees built a sizable bankroll for Christmas. The savings are placed with the Evansville Morris Plan, which has one of the largest clubs in this area.

PLANT GUARDS... As you all know, the plant, office and grounds are now under protection by the Pinkerton Security system. The reason for securing our property is to safeguard it against fire and theft. Fire could destroy all of our jobs if it were to begin at night and go unnoticed for several hours. Even with the sprinkler system, water damage could be extensive, if it were to extinguish the blaze.

Theft, from outsiders as well as employee pilferage, is serious threat to our job security and will be checked. Control of traffic, parking, and plant visitors, are also duties performed by the guard service. A letter, that will answer many questions, will follow,

explaining the guard service and what it means to you.
